A MAJOR ADVANCEMENT IN SURFACE SANITATION AND PROTECTION AGAINST HUMAN CORONAVIRUS, GERMS AND OTHER PATHOGENS!

In recent certified testing, against human coronavirus 229E (the latest US government standard for testing against CoVid-19), SiArmor Antimicrobial Surface Protectant attained a 99.43% kill rate in 5 minutes with continued protection for up to 90 days!

SiArmor Antimicrobial Surface Protectant is an EPA registered antimicrobial combined with water and a proprietary silicone base with 3 global patents. The patented formulation creates a unique silicone tripod anchor for the antimicrobial to attach to creating a covalent bond.

Contains no: Alcohol, Fragrance, Petroleum, or Gluten

ADDITIONAL INFORMATION:

- ✓ In recent certified testing against human coronavirus 229E (the latest US government standard for testing against CoVid-19), it attained 99.43% kill rate in 5 minutes with continued protection for up to 90 days!
- ✓ Forms a covalent bond with surfaces.
- ✓ Withstands normal sanitation procedures your organization has implemented to combat germs, bacteria and viruses.
- ✓ Produces a mechanical kill versus a chemical kill (cannot create superbugs).
- ✓ Surface adhesion 3 times stronger than other antimicrobial products
- ✓ Approved for use on all porous, non-porous, surfaces and filters which dries transparently in minutes.
- ✓ Can continuously lower bacterial & viral load interiors in facilities, buses, automobiles, and more.
- ✓ Extremely cost effective compared to competitive products.
- ✓ 2-year shelf life once container is opened.

Ready to Use & Concentrate quantities available:

- 32 oz Bottle: Case Count – 12 with 4 Microfiber mitts
- 1 Gallon Container: Case count – 4
- 5 Gallon Container
- 55 Gallon Drum
- 275 Gallon Tote

EPA Reg.# 64881-7-84917
EPA Est. # 84917-MI-1
